

AQUASEAL Protection Screens

Dividing screens to keep workers protected throughout the current Covid-19 pandemic.

The team at Aquaseal Rubber have been working hard over the last two weeks to design and manufacture a dividing screen to be used in industries that are still operating throughout the COVID-19 pandemic.

In factories and workshops, abiding by the Government and Public Health England social distancing rules can be difficult. These screens have been designed for workers to maintain a safe distance from each other, whilst continuing to carry out their roles as efficiently as possible.

**Full and
Half Screens
Available**

**PRICES FROM
£175.00**

**MADE IN
BRITAIN**

PRICING

1 - 10	£348.00 each
11 - 30	£244.00 each
31 - 50	£210.00 each
51 - 100	£175.00 each

The plastic screen is made from shatterproof **easy-to-clean** plastic. The screen can be easily removed by sliding in and out of place. The screens sit on a **sturdy steel box** with two **rubber feet for grip** to avoid unwanted movement or slipping in a work environment. The steel construction also means that the structure can be easily wiped down during cleaning.

The **lightweight structure** is easy to move around or replace if needed. Available in two different sizes as standard, but with bespoke options available, see specification below:

Full Screen Type

1600mm high x 1500mm wide
(Plastic screen size 1400mm high x 1500mm wide). Approx. weight 12kg.

Half Screen Type

1700mm high x 1500mm wide
(Plastic screen size 1000mm high x 1500mm wide). Approx. weight 12kg.

Rubber Feet

Ribbed 3mm rubber feet help prevent unwanted movement or slipping.

Shatterproof

The screen is made from a shatterproof Polycarbonate plastic.

Easy to Clean

The screen and steel construction are both easily cleaned.

Lightweight Structure

Easy to pick up and move around or reposition if needed.
